

Environment Setup

The starter code and reference solution is available at <https://github.com/skyzh/mini-lsm>.

Install Rust

See <https://rustup.rs> for more information.

Clone the repo

```
git clone https://github.com/skyzh/mini-lsm
```

Starter code

```
cd mini-lsm/mini-lsm-starter  
code .
```

Install Tools

You will need the latest stable Rust to compile this project. The minimum requirement is 1.74 .

```
cargo x install-tools
```

Run tests

```
cargo x copy-test --week 1 --day 1  
cargo x scheck
```

Now, you can go ahead and start [Week 1: Mini-LSM](#).
